

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-1542
Project Name	AnswerBot – AI-powered FAQ and customer support automation
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics – who are they?
I'm trying to	List their outcome or “job” – what are they trying to achieve?
but	Describe what problems or barriers stand in the way – what bothers them most?
because	Enter the “root cause” of why the problem or barrier exists – what needs to be solved?
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?

Problem Statement Diagrams – AnswerBot

PS-1 – Support Operations Manager (Priya)

I am	I'm trying to	But	Because	Which makes me feel
a customer support operations manager handling a large backlog of repetitive user queries	organise, classify and answer common questions quickly	writing and maintaining FAQs manually takes too much time and the entries are scattered	there is no automated tool to draft answers, assign categories or search past entries	Overwhelmed and frustrated

PS-2 – Public / Consumer User

I am	I'm trying to	But	Because	Which makes me feel
a customer or public user looking for help with a product or service	find a clear answer to my question without waiting for support	I have to scroll through unorganised content or wait for a reply	FAQs are not categorised or searchable by keyword, so I cannot find the right one	Frustrated and unsupported

Problem Statement Table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a customer support operations manager handling a large backlog of repetitive user queries	organise, classify and answer common questions quickly	writing and maintaining FAQs manually takes too much time and the entries are scattered	there is no automated tool to draft answers, assign categories or search past entries	Overwhelmed and frustrated
PS-2	a customer or public user looking for help with a product or service	find a clear answer to my question without waiting for support	I have to scroll through unorganised content or wait for a reply	FAQs are not categorised or searchable by keyword, so I cannot find the right one	Frustrated and unsupported

How AnswerBot addresses these: Gemini-powered FAQ generation and automatic categories reduce manual writing for PS-1, while keyword search and a public, categorised FAQ list let users in PS-2 find answers instantly. JWT-based access keeps editing limited to authorised authors.
